

# Table of contents

## Part 1

<b>1</b>	<b>Wave-Particle Duality</b>	
1.1	Current definition of duality .....	3
1.2	Explanation of the duality .....	4
1.3	First principle of duality .....	5
1.4	Important deduction.....	6
1.5	Second principle of duality.....	6
1.6	Third principle of duality .....	6
1.7	Young Slits .....	7
1.8	Polymorphism.....	7
1.9	History .....	8
1.10	Conclusions .....	8
1.11	Confirmation.....	8
<b>2</b>	<b>Spacetime</b>	
2.1	Neutral electrons, or "μDomains" .....	11
2.2	Spacetime and a vacuum .....	12
2.3	About spacetime .....	12
2.4	Curvature of spacetime .....	13
2.5	Electromagnetic waves .....	13
<b>3</b>	<b>Movements in Spacetime</b>	
3.1	EM waves .....	15
3.2	Movements in spacetime .....	16
3.3	Mathematical formalization.....	16
3.4	Polarity of spacetime .....	17
3.5	Example .....	17
<b>4</b>	<b>Forces in Spacetime</b>	
4.1	Elasticity of spacetime .....	19
4.2	Principle of "Least curvature" .....	19
4.3	Principle of "Least relative density" .....	20
4.4	Density of spacetime .....	20
4.5	Annihilation process.....	21
4.6	Attractive force .....	22
4.7	Repulsive force .....	23
<b>5</b>	<b>Electron-Positron Annihilation</b>	
5.1	Scenario .....	25
5.2	Different volumes .....	26
5.3	Interpretation .....	27
<b>6</b>	<b>Nature of Particles</b>	
6.1	Constitution of particles .....	29
6.2	Recapitulation.....	31
6.3	Conclusions .....	31
6.4	Einstein's Point of view .....	33
6.5	The fifth dimension?.....	33

<b>7</b>	<b>Clarification</b>	
7.1	What we know .....	35
7.2	The Spacetime Model contribution .....	36
7.3	Explanation.....	37
7.4	Importance of forces in spacetime.....	38

## Part 2

<b>8</b>	<b>Mass</b>	
8.1	Starting point .....	43
8.2	Basic concept.....	44
8.3	Current theory of spacetime curvature .....	45
8.4	Explanation of spacetime deformation .....	45
8.5	Particular cases .....	46
8.6	Mass-volume equivalence .....	47
8.7	Einstein Field Equations.....	47
<b>9</b>	<b>Open and Closed Volumes</b>	
9.1	Principle.....	49
9.2	Kinds of volumes.....	51
9.3	Conversions .....	52
<b>10</b>	<b>Gravity</b>	
10.1	Principle of gravity .....	53
10.2	Principle of split .....	54
10.3	Stress-energy tensor.....	55
10.4	Synthesis .....	56
10.5	Weelher's Intuition.....	58
10.6	Example of gravity .....	58
10.7	Equivalence principle .....	59
10.8	Increase of mass.....	60
10.9	Example of volume-mass equivalence .....	61
10.10	Crystals .....	61
10.11	The Higgs Boson .....	62
10.12	Conclusions .....	63

## Part 3

<b>11</b>	<b>The "Distributed Charge" Model</b>	
11.1	Electron in the atom.....	69
11.2	The "distributed charge" model.....	70
11.3	The Schrödinger Model.....	70
11.4	The vacuum enigma.....	71
11.5	The PE effect .....	72
11.6	U and d quarks .....	72
11.7	Leptons .....	73
11.8	Mesons and baryons .....	73

<b>12</b>	<b><math>\mu</math>Domains</b>	
12.1	The basic particles .....	75
12.2	$\mu$ Domains.....	76
12.3	Existence of $\mu$ Domains.....	77
12.4	Properties of $\mu$ Domains .....	78
12.5	Basic components of the universe .....	78
12.6	Verification.....	79
12.7	Requirements .....	79
12.8	The $\pi$ meson and the muon.....	81
12.9	Reality.....	81
12.10	Calculations .....	82
12.11	Tau .....	83
12.12	Quantity of $\mu$ D9 inside the tau .....	84
12.13	Conclusions .....	85
<b>13</b>	<b>U and d Quarks</b>	
13.1	Starting point .....	87
13.2	U and d quarks construction .....	88
13.3	Confirmation.....	89
<b>14</b>	<b>Antimatter</b>	
14.1	Starting points.....	91
14.2	Homogeneity of the atom .....	92
14.3	Example .....	94
14.4	The antimatter in the universe .....	95
14.5	Validation of the Spacetime Model.....	96
<b>15</b>	<b>Nucleons</b>	
15.1	Proton.....	97
15.2	Neutron .....	98
15.3	Confirmation by experimentation.....	98
15.4	Direct proton creation.....	99
15.5	Proton synthesis.....	101
15.6	Asymptotic freedom .....	101
15.7	Hydrogen atom (proposal).....	102
15.8	Equality of charge of the proton.....	102
15.9	Antineutron.....	103
<b>16</b>	<b>Interactions</b>	
16.1	Guiding principle.....	105
16.2	Formulation (proposal).....	107
<b>17</b>	<b>The Standard Model</b>	
17.1	Basic particles.....	109
17.2	Neutrinos .....	109
17.3	Other particles .....	111

## Part 4

<b>18</b>	<b>Electromagnetic Radiations</b>	
18.1	History .....	117
18.2	Nature of EM radiations .....	118
18.3	Separation of media.....	118
18.4	Properties of the "Real medium" .....	119

18.5	Constant speed of light .....	120
18.6	Case of two reference spaces.....	120
18.7	Recapitulation.....	122
18.8	Displacement of charged particles.....	122
18.9	The $\Delta q/\Delta t$ .....	123
18.10	Changes in orbitals .....	123

## 19 Electromagnetism

19.1	The electron .....	125
19.2	1D polarization of $\mu$ Domains .....	126
19.3	3D polarization of $\mu$ Domains .....	127
19.4	Principle of magnetism.....	127
19.5	The spin (proposal).....	129
19.6	Rule of addition of spins.....	131

## 20 The Photon

20.1	Justification of the photon .....	133
20.2	Inconsistencies of the photon .....	134
20.3	Decrease in $1/r^2$ .....	134
20.4	The "quantified wave" .....	135
20.5	The emission.....	136
20.6	The travel.....	136
20.7	The reception .....	137
20.8	Confirmation.....	138
20.9	The experimenter.....	138
20.10	Young Slits .....	139
20.11	The Heisenberg Uncertainly Relation .....	140
20.12	EPR (proposal) .....	141
20.13	Conclusions .....	142

## 21 Waves and complements

21.1	EM waves: simplified explanation .....	145
21.2	EM waves: detailed explanation.....	145
21.3	Matter waves: simplified explanation .....	146
21.4	Matter waves: detailed explanation.....	147
21.5	Difference .....	148
21.6	$E = h\nu$ .....	149
21.7	$e+e^-$ annihilation.....	149
21.8	Light curvature .....	150
21.9	Gravitational time dilatation.....	151
21.10	Mass and energy .....	152
21.11	$E = mc^2$ .....	152

# Part 5

## 22 Atom

22.1	Energy levels of orbitals .....	159
22.2	The $E_0$ energy level.....	161
22.3	Schrödinger's Equation .....	162
22.4	The Pauli Principle .....	162

<b>23</b>	<b>Nucleus</b>	
23.1	Isobars.....	163
23.2	Isotopes.....	164
23.3	Deuteron.....	165
23.4	The He nucleus.....	166
23.5	H isotopes.....	167
23.6	Possible explanation of binary steps.....	168
23.7	The Bethe-Weizsäcker Formula.....	170
<b>24</b>	<b>Quarks and Mesons (proposal)</b>	
24.1	C and s quarks.....	173
24.2	T and b quarks.....	174
24.3	Layer model.....	174
24.4	The Schrödinger Equation.....	175
24.5	The $\pi^0$ meson.....	175
24.6	Decay of the $\pi$ meson.....	177
<b>25</b>	<b>Radioactivity (proposal)</b>	
25.1	Origin of the radioactivity.....	179
25.2	Mathematical point of view.....	179
25.3	$\beta^-$ radioactivity.....	180
25.4	$\beta^+$ radioactivity.....	181
25.5	Alpha radioactivity.....	181
25.6	Electronic capture.....	182
25.7	W and Z Bosons (a proposal).....	182
<b>26</b>	<b>Forces</b>	
26.1	Gravity.....	183
26.2	The weak nuclear force.....	183
26.3	The strong nuclear force.....	183
26.4	The EM force.....	184
26.5	Unification of the two fundamental forces.....	184
<b>27</b>	<b>The Universe (proposal)</b>	
27.1	The "enigma of the electron".....	185
27.2	Two possibilities.....	187
27.3	Division.....	187
27.4	The multiplication.....	188
27.5	The nature behavior on Earth.....	188
27.6	Scenario of replication.....	189
27.7	Spacetime.....	189
27.8	Before the creation of the universe.....	191
27.9	The creation of objects.....	191
27.10	Creation of the universe.....	192
27.11	Solved enigmas.....	195
27.12	The assumption of the Big-bang.....	197
<b>28</b>	<b>Conclusions</b>	
28.1	Credits.....	199
28.2	Enigmas.....	199
28.3	Disagreements about the quantum mechanics.....	208
28.4	Predictions.....	208

## **29 Compléments**

29.1	About pedagogy .....	211
29.2	About mathematics .....	211
29.3	The Einstein inheritance .....	211
29.4	About the Author .....	212
29.5	Patent rights .....	213
29.6	Web sites references .....	213
